

KIC 60001-018 BRAKE DRUM

Independent FMVSS-121 Test Results

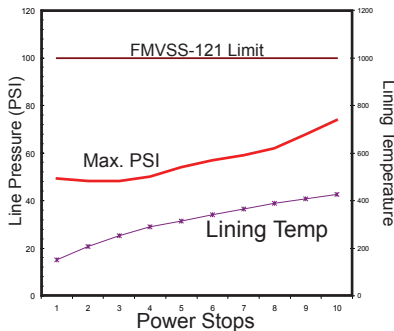

KIC drum exceeds FMVSS-121 Minimum brake retardation ratio at all tested air pressures.

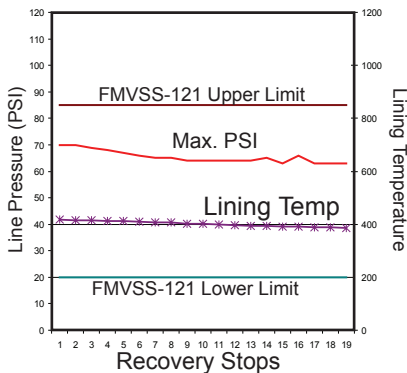

KIC Drums Make the Grade...Easier!

KIC's Federal Motor Vehicle (FMVSS-121) testing on our new 60001-018 industry standard brake drum easily surpasses Federal requirements. The drum showed excellent fade and recovery characteristics. This means better brake drum and lining wear properties.

KIC's 60001-018 drum provides safe power stops with lower brake application pressures.

The KIC 60001-018 drum's thermal fade properties exceed federal requirements.

We sold out of our first production run of the new 60001-018 brake drum, but KIC is now taking orders for 2nd Quarter of 2007 deliveries.

60001-018 drums are eccentrically balanced (no welded weights to fall off or holes to weaken the drum). Equivalent to Webb 66864B and Gunitite 3600AX

Not all brake drums are created equal. Ask about Independent Testing Results, Liability Insurance and Warranty!
